

Recycled Candles

Recycle candle wax. If you have candle wax left over from used candles, especially scented ones why not recycle them & make an awesome scented gift?

You will need:

- 1 med. size pan
- 1 metal bowl big enough to fit inside pan
- Candle wax
- 1 candle wick
- 1 clean glass jar with wide mouth & lid
- 3 pieces of ribbon
- optional: candle fragrance.
- Small metal strainer

Instructions

Fill the med size pan to half way with water, place metal bowl inside pan making sure water does not spill over into it. Bring to a slow boil. Add candle wax to bowl & let pan simmer until wax is melted. At this stage you can add candle fragrance.

Tie ribbon in a bow around neck of jar. Insert candle wick. Place strainer over mouth of jar & slowly pour melted wax through it & into jar until almost full. Leave to set. Once completely cooled place lid on jar & voila there you have it. A nice new jar candle gift. by S Rumpler
